*The performance data quoted here represents past performance. Current performance may be lower or higher than the performance quoted above. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past Performance is no guarantee of future results. A Fund's performance, especially for very short periods of time, should not be the sole factor in making your investment decisions. Total Annual Expense ratio: 8.73% In 2018, 2019, and 2020, the Adviser had voluntarily agreed to waive all or a portion of its management fee and incentive fee (and to the extent necessary, bear other expenses of or make payments to the Fund) to limit net expenses throughout the periods. The waiver was not contractual and could be terminated at any time and was not subject to recoupment by the Adviser. The expense waiver is no longer in effect. Quotations of performance reflect the fee waiver and performance would have been lower had the waiver not been in effect. ## GLOSSARY

**The Bloomberg US Corporate High Yield Bond Index** measures the USD-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below.

**IRR** refers to internal rate of return, which is the annualized rate of return on an investment over its life when all positive and negative cash flows associated with the investment are considered.

**The Morningstar Loan Index** is a market value weighted index designed to measure the performance of the U.S. leveraged loan market.

**Standard Deviation** is a measure that provides the dispersion around a mean.

**NAV** refers to a fund's net asset value per share. It is calculated by dividing the total net assets of a fund by the total shares outstanding.

**Correlation:** A measurement of the interdependence between two variable quantities.

**Floating Rate:** Refers to debt instruments such as loans or bonds, that do not have a fixed rate of interest over the life of the instrument.

## IMPORTANT DISCLOSURE INFORMATION AND RISK FACTORS

**Risk:** The Fund is suitable for investors who can bear the risks associated with the Fund's limited liquidity and should be viewed as a long-term investment. Diversification does not eliminate the risk of experiencing investment losses. Our shares have no history of public trading, nor is it intended that our shares will be listed on a national securities exchange at this time, if ever. No secondary market is expected to develop for our shares; liquidity for our shares will be provided only through quarterly repurchase offers for no less than 5% of and no more than 25% of our shares at net asset value, and there is no guarantee that an investor will be able to sell all the shares that the investor desires to sell in the repurchase offer. Due to these limited restrictions, an investor should consider an investment in the Fund to be of limited liquidity. Investing in our shares may be speculative and involves a high degree of risk, including the risks associated with leverage. Investing in the Fund involves risks, including the risk that shareholder may lose part of or all of their investment. We intend to invest primarily in the equity and, to a lesser extent, in the junior debt tranches of CLOs that own a pool of senior secured loans. Our investments in the equity and junior debt tranches of CLOs are exposed to leveraged credit risk. Investments in the lowest tranches bear the highest level of risk. We may pay distributions in significant part from sources that may not be available in the future and that are unrelated to our performance, such as a returns of capital or borrowing. The amount of distributions that we may pay, if any, is uncertain. Alps Distributors Inc. serves as our principal underwriter, within the meaning of the 1940 Act, and will act as the distributor of our shares on a best efforts' basis, subject to various conditions.

- We intend to make a distribution each month to our shareholders of the net investment income of the Fund after payment of Fund operating expenses. The distribution rate may be modified from time to time. The distribution rate is calculated as next monthly declared distribution \* 12 divided by the share price. In 2019, 2020, 2021, and 2022 the distribution did not include return of principal.
- There is no guarantee that shareholders will be able to sell; our repurchase offers will be conducted pursuant to a fundamental policy, pursuant to which we intend to offer to repurchase a minimum of 5% of our outstanding shares on a non-discretionary basis once each calendar quarter of each year. Although we will make quarterly repurchase offers, investors should consider our shares to be of limited liquidity.
- Additional Fund operating expenses can be found in our prospectus [https://flatrockglobal.com/wp-content/uploads/FROPX-Prospectus\\_Website.pdf](https://flatrockglobal.com/wp-content/uploads/FROPX-Prospectus_Website.pdf).
- Vintage: refers to year of inception. Internal Rates of Return for realized CLOs by year of CLO's inception. 2009 and 2010 data not available, as almost no CLOs were issued this year and there is not a representative sample of return data; CLOs issued in 2018 and later have largely not terminated Source: Nomura Securities; Past performance is not indicative of future results.
